**Outreach Activities Aimed at Individuals Considered High Risk for Substance Abuse (including promoting awareness the risk of communicable diseases such as Hepatitis C and HIV associated with injection drug use, recommending steps that can be taken to ensure that HIV transmission does not occur and encouraging entry into treatment):**

- Our Addictions Treatment Team has worked tirelessly to ensure continuity of care for their clients throughout the entirety of the pandemic. When we had to abruptly stop our face to face services in March of this year, they recognized the increased risk of relapse faced by this group and found creative ways to ensure no one who needed treatment would go without, including, but not limited to: offering addictions group counseling via video platform to anyone within our service area, doing more frequent phone sessions with those who did not have the technology capability to participate in video groups, and pursuing grant funding to provide technology for those who couldn't afford it. As a result of their efforts, we more than doubled the number of individuals receiving addictions treatment at our agency over the past year.

**New Services and New Partnerships in the County:**

- None currently, however the office and administration continually look for and evaluate community strategic partnerships to assist those with mental illness and addiction needs in Tippecanoe County.
